

# QYBRA®

The beauty innovation

**Creating new business opportunities**

- Improves wrinkles, skin elasticity and moisture significantly
- Influences the dermal skin area, thus counteracting the root cause of aging

# SMOOTH SKIN, SMART BUSINESS

The market potential for nutricosmetics is enormous. The reason is the desire of many women for a perfect appearance and a pure complexion. The over-forties in particular tend to focus strongly on their personal well-being. QYRA® fulfills these desires – and makes them look younger.

# QYRA®

## Excellent prospects for success: Market research backs QYRA®

Asian markets are currently leading the way; however, the trend to nutricosmetics is spreading quickly within Europe, USA and other markets. Studies show why:\*

- Beauty and anti-aging are vital issues for women
- Many women over 40 are not satisfied with the short-lived and superficial results of topical products such as creams
- These women consider the concept of beauty-from-within to be more effective with positive effects on the whole body
- Collagen is directly associated with anti-aging
- It is perceived as something natural, the key-requirement for nutritional supplements

# COLLAGEN – THE REPAIR FUNCTION FOR THE SKIN

- Collagen is naturally produced by the body
- It is the major structural component of skin and connective tissue
- It is responsible for the skin's firmness and gives healthy skin its smooth appearance
- Loss of collagen in the dermal skin layers leads to skin aging; the connective tissue subsequently loses its firmness and wrinkles appear

**> Uptake of QYRA® restructures the skin from within**

**Collagen is the major structural component of skin, comprising about 80 % of its dry weight.**

# QYRA®

## made of collagen for beauty-from-within

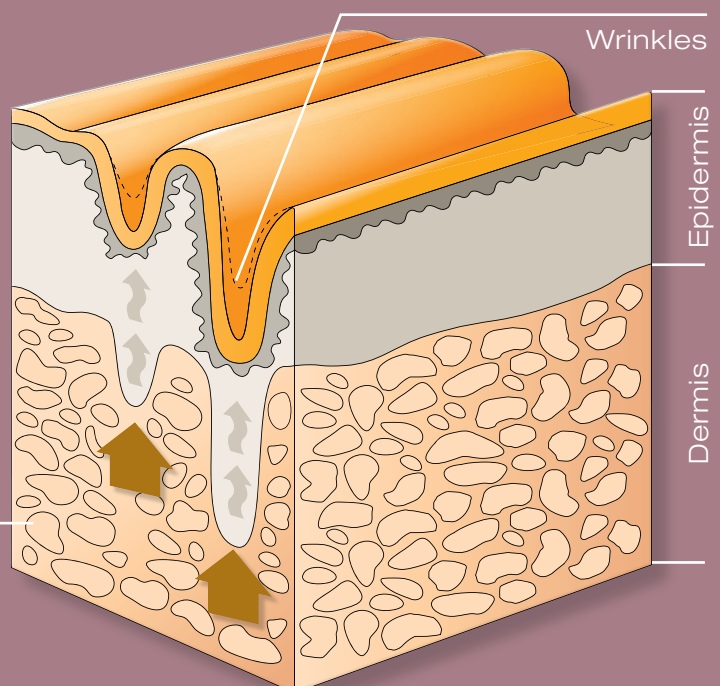

Real beauty comes from within. QYRA® provides the skin with highly effective collagen peptides that enter the deep dermal layers of the skin – where topical cosmetics cannot be effective.

- The substance used – VERISOL® – comprises scientifically proven Bioactive Collagen Peptides®
- The result: QYRA® works systemically on the entire body and smoothens the skin from within. It improves skin elasticity, reduces wrinkles and increases moisture significantly

Stimulation of the extra-cellular matrix molecules in human skin cells leads to improved skin elasticity and the reduction of wrinkles.

Collagen fiber

# CLINICAL STUDIES SHOW VISIBLE RESULTS

Clinical studies involving more than 100 women have shown visible effects after just a short period of taking VERISOL® collagen peptides.\*

- The skin aging process was significantly delayed
- The skin became noticeably firmer and smoother
- A daily dose of 2.5 g, taken over four weeks, produced a measurable effect on the reduction of wrinkles and the improvement of skin elasticity
- Improves the appearance of wrinkles
