# IMPROVING PET HEALTH

## Feeding Mobility

With PETAGILE®, GELITA has developed an innovative ingredient for the regeneration of joint cartilage of animals. The specially optimized bioactive collagen peptides of PETAGILE® promote joint cartilage growth and thereby counteract wear on joints caused by aging and excess load.

**PETAGILE®**  
Feeding Mobility

- Bioactive Collagen Peptides® proven to stimulate joint cartilage metabolism in pets and especially dogs
- Pure porcine origin
- A new generation active ingredient improving mobility
- A pure collagen protein with no side effects
- Specifically formulated to regain and support mobility and agility in pets

As a recognized supplier of pet food ingredients, GELITA is able to provide its customers with premium fats, proteins, minerals, gelatine and collagen peptides for exceptional easy to digest foods that pets love.

For our furry friends, we not only offer ingredients for pet food but also for nutritional supplements keeping our companion healthy and agile. Our ingredients improve pet food both functionally and by providing a better nutritional profile.

- Sustainably produced from natural, renewable raw materials
- All ingredients only derived from high quality animal products
- Made from only one species
- Grain-free, gluten-free
- State-of-the-art processing ensures highest quality

# IMPROVING PET NUTRITION

## Essential Nutrients for Pets

### GELIMIN<sup>®</sup>

- Organic calcium and phosphorous source
- 100% animal origin
- Ideal ratio calcium/phosphorous 1.3 : 1.0
- Low in heavy metals
- Available as fine powder or granulated

### GELIPRO<sup>®</sup> DIGEST

Improving Animal Nutrition

- High digestible protein
- Mono-species
- Bovine or porcine origin
- Various crude protein content available
- Low in heavy metals
- Good solubility
- Excellent for extruded products

### GELIFAT<sup>®</sup>

- High grade animal fat
- Mono-species
- Bovine or porcine origin
- Low in free fatty acids (FFA)
- Highest purity
- Stabilization with antioxidants possible

# IMPROVING PET FOOD

## Techno Functionality in Pet Food Production

### GELIPRO® BIND

For Techno-Functionality

- Functional proteins, edible collagen
- Pure porcine origin
- Water-binding and emulsifying properties
- Component binding
- Texturizing properties
- Formation of thermo-reversible gels
- Enhancing kibble stability
- Stabilizing extrusion process

### GELITA® GELATINE

Versatile and Tailor-Made

- High-quality collagen protein
- Stabilizing extrusion process
- Enhancing kibble stability
- Gelling agent, stabilizer, binder, emulsifier, texturizer
- Bovine or porcine origin
- Clean-label
