VERISOL® HST

Beauty Gummies Conquer the Market

The market for fortified gummies is continuously growing, with no signs of slowing down. Consumers increasingly seek convenient and enjoyable ways to incorporate supplements into their daily routines. Especially collagen-enriched gummies for beauty-from-within concepts have the potential to drive the market. In response to this surging demand, GELITA introduced VERISOL® HST, which has been specifically developed for the development of beauty gummies.

Producing gummies with a high collagen content involves significant challenges. To achieve the desired daily collagen intake, there are primarily two strategies: you can either increase the number of servings consumed per day or enhance the collagen concentration in each serving.

The preferred option of increasing the collagen content per gummy is somewhat demanding for manufacturers and the ingredients used. VERISOL® HST revolutionizes the approach to creating high-quality collagen-enriched products. Combining the properties of gelatin with the health benefits of Bioactive Collagen Peptides (BCP®), it enables to incorporate the recommended daily VERISOL® dose in just three gummies without compromising the quality of the final product.

VERISOL® HST Allows Higher Collagen Concentration in Gummies

Up to 6 % Collagen

Gummy with
Collagen Peptide

Up to 33 % Collagen

Gummy with
VERISOL® HST

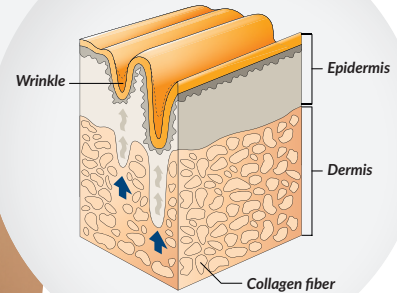

VERISOL® Delivers Unmatched Benefits!

VERISOL® HST contains all you need to make collagen-rich, fortified gummies reality. It's the ingredient solution for highly effective beauty-from-within products.

VERISOL® Bioactive Collagen Peptides (BCP®) are scientifically proven to support the health of hair, nail, and skin from inside out. With their unique and specific peptide sequence, they positively influence collagen metabolism – stimulating the body to produce more collagen. A series of VERISOL®-specific published studies confirm its efficacy in improving various parameters of the skin (elasticity, wrinkle depth and volume, skin waviness) as well as the strength and appearance of hair and nails.

VERISOL®?

Discover the Power of VERISOL® HST for Fortified Gummies

VERISOL® HST allows for the incorporation of high levels of Bioactive Collagen Peptides (BCP®) while maintaining the indulgent taste, texture, and overall sensory appeal that consumers love. With a remarkable 33 % VERISOL® content, the recommended daily intake can be delivered with just three gummies, leading to favorable cost-in-use.

Enhanced Technical Performance for Seamless Production

VERISOL® HST also stands out for its superior technical performance. It produces significantly less dust during production, storage, and transportation, which simplifies handling and reduces the time and cost associated with cleaning.

Moreover, VERISOL® HST features enhanced dissolution properties, such as adjustable particle sizes and improved wettability/dispersibility profiles, coupled with a higher overall bulk density. This facilitates the creation of high-concentration solutions, ensuring that particles quickly settle in dissolution vessels, minimizing lump formation and reducing undesirable foaming during processing. The result is a smoother, more reliable production process with fewer rejects.

Mix of Gelatin and Collagen Peptides

VERISOL® HST

Simplified Production *With Natural Gelling Properties*

One of the standout features of VERISOL® HST is its natural gelling properties, eliminating the need for additional gelling agents. This simplifies the production process and ensures that your gummies achieve the perfect texture that both technical experts and consumers desire.

Tailored Solutions for Consumer Needs

With GELITA's expertise in Bioactive Collagen Peptides and gelatin, we offer a variety of concepts that can be customized to meet the specific needs of end consumers. Whether you're looking to provide the required daily dosage of VERISOL® or combine it with vitamins in gummies, our solutions are designed to cater to diverse consumer preferences and health requirements.

Choose VERISOL® HST for your fortified gummies and embrace a solution that enhances product quality, simplifies production, and meets the evolving needs of health-conscious consumers.

VERISOL® HST – Consumers Love it ...

- Natural
- Purine free
- Lactose free
- GMO free
- Clean label – no E-numbers
- Non allergenic
- Health benefits
- Preferred texture
- Nice appearance
- Great taste
- Perfect mouthfeel
